

## Integrated Impact Assessment Report for Service Specifications

|   |  |  |  |
|---|--|--|--|
| <b>Reference Number</b>                             | A14S01 Revision (A14/S/a)  |  |  |
| <b>Service Specification Title</b>                  | Complex Home Ventilation Services  |  |  |
| <b>Accountable Commissioner</b>                     | Kathy Blacker  | <b>Clinical Lead</b>   | Dr Michael Davies<br>& Dr Martin Allen |
| <b>Finance Lead</b>                                 | Craig Holmes   | <b>Analytical Lead</b>   | Jay Emin                               |
| <b>Section K - Activity Impact</b>                  |  |  |  |
| <b>Theme</b>  | <b>Questions</b>   | <b>Comments</b> (Include source of information and details of assumptions made and any issues with the data)                     |  |
| K1 Current Patient Population & Demography / Growth | K 1.1 What is the prevalence of the disease/condition?   | K1.1 Approximately 20 people per 100,000 population may be receiving complex home ventilation (Lloyd-Owen ERJ. 2005;25:1025-31.) |  |
|   | K1.2 What is the number of patients eligible for this treatment under currently routinely commissioned | K1.2 Approximately 30-40% of above will fit complex definition above   |  |

|  |   |   |
|--|---|---|
|  | <p>care arrangements?</p> <p>K1.3 What age group is the treatment indicated for?</p> <p>K1.4 Describe the age distribution of the patient population taking up treatment?</p> <p>K1.5 What is the current activity associated with currently routinely commissioned care for this group?</p> <p>K1.6 What is the projected growth of the disease/condition prevalence (prior to applying the new policy) in 2, 5, and 10 years</p> <p>K1.7 What is the associated projected growth in activity (prior to applying the new policy) in 2,5 and 10 years</p> <p>K1.8 How is the population currently distributed</p> | <p>K1.3 Adults only (including an increasing number of children transitioning into adult services) transition)</p> <p>K1.4 Two main groups - adults with neuromuscular conditions and adults with complex ventilation needs</p> <p>K1.5 All eligible patients</p> <p>K1.6 No anticipated increase</p> <p>K1.7 Growth accounted for by improved access to effective treatment and better outcomes rather than increase in prevalence – anticipated growth in activity up to 10% after 5 years eg NICE MND Guideline CG 105 and NG 42 recommends early respiratory assessment for all patients with MND</p> <p>K1.8 Evenly distributed across England</p> |
|--|---|---|

|   |   |  |
|---|---|--|
|   | geographically?   |  |
| K2 Future Patient Population & Demography | <p>K2.1 Does the new policy: move to a non-routine commissioning position / substitute a currently routinely commissioned treatment / expand or restrict an existing treatment threshold / add an additional line / stage of treatment / other?</p> <p>K2.2 Please describe any factors likely to affect growth in the patient population for this intervention (e.g. increased disease prevalence, increased survival)</p> <p>K 2.3 Are there likely to be changes in geography/demography of the patient population and would this impact on activity/outcomes? If yes, provide details</p> <p>K2.4 What is the resulting expected net increase or decrease in the number of patients who will access the treatment per year in year 2, 5 and 10?</p> | <p>K2.1 No change to -routine commissioning position – update to existing specification</p> <p>K2.2 Increased survival with improved care</p> <p>K2.3 Not anticipated</p> <p>K2.4 No significant change, although designated centres may see small increase from non specialised centres. Some patients may progress from weaning centres into CHV services potentially up to 40% with e.g. tracheostomy</p> |
| K3 Activity                               | <p>K3.1 What is the current annual activity for the target population covered under the new policy? Please provide details in accompanying excel sheet</p> <p>K3.2 What will be the new activity should the new /</p>   | <p>K3.1 Difficult to define as no clear coding mechanism to define existing patient population</p> <p>K3.2 Increased activity will originate</p>   |

|   |  |  |
|---|--|--|
|   | <p>revised policy be implemented in the target population? Please provide details in accompanying excel sheet</p> <p>K3.3 What will be the comparative activity for the 'Next Best Alternative' or 'Do Nothing' comparator if policy is not adopted? Please details in accompanying excel sheet</p>      | <p>from</p> <ul style="list-style-type: none"> <li>• Improved recognition of neuromuscular diseases</li> <li>• Children transitioning into adult services through improved survival</li> <li>• Step down from weaning services</li> </ul> <p>K3.3 Remain in critical unit or death</p> |
| K4 Existing Patient Pathway                                     | <p>K4.1 If there is a relevant currently routinely commissioned treatment, what is the current patient pathway? Describe or include a figure to outline associated activity.</p> <p>K4.2. What are the current treatment access criteria?</p> <p>K4.3What are the current treatment stopping points?</p> | <p>K4.1 Patient pathway unchanged</p> <p>K4.2 Unchanged</p> <p>K4.3 Unchanged</p>  |
| K5 Comparator (next best alternative treatment) Patient Pathway | <p>K5.1 If there is a 'next best' alternative routinely commissioned treatment what is the current patient pathway? Describe or include a figure to outline associated activity.</p>   | <p>K5.1 No comparator available</p>  |

|                               |   |  |
|-------------------------------|---|--|
|                               | <p>K5.2 Where there are different stopping points on the pathway please indicate how many patients out of the number starting the pathway would be expected to finish at each point (e.g. expected number dropping out due to side effects of drug, or number who don't continue to treatment after having test to determine likely success). If possible please indicate likely outcome for patient at each stopping point.</p>  | <p>K5.2 Depending on underlying illness patients may die along the pathway. These are not drug related deaths.</p>   |
| <p>K6 New Patient Pathway</p> | <p>K6.1 Describe or include a figure to outline associated activity with the patient pathway for the proposed new policy</p> <p>K6.2 Where there are different stopping points on the pathway please indicate how many patients out of the number starting the pathway would be expected to finish at each point (e.g. expected number dropping out due to side effects of drug, or number who don't continue to treatment after having test to determine likely success). If possible please indicate likely outcome for patient at each stopping point.</p> | <p>K6.1 As above in K5.1</p> <p>K6.2 As above in K5.2</p>  |
| <p>K7 Treatment Setting</p>   | <p>K7.1 How is this treatment delivered to the patient?</p> <p>K7.2 Is there likely to be a change in delivery setting or capacity requirements, if so what?<br/><i>e.g. service capacity</i></p>   | <p>K7.1 Predominantly home based activity but will include inpatient stays for initiation and reviews of treatment as well as outpatient reviews</p> <p>K7.2 No change anticipated</p> |

|                      |  |  |
|----------------------|--|--|
| <p>K8 Coding</p>     | <p>K8.1 In which datasets (e.g. SUS/central data collections etc.) will activity related to the new patient pathway be recorded?</p> <p>K8.2 How will this activity related to the new patient pathway be identified?(e.g. ICD10 codes/procedure codes)</p>  | <p>K8.1 SUS data will not identify this patient population. Need to consider development of a national registry of CHV patients.</p> <p>K8.2 Current outpatient activity is identified in HRG 37a which includes CPAP. A specific CPAP code would allow this work to be differentiated. A specific code for physiotherapy interventions needs developing. For individuals who are unable to attend hospital a code for the outreach service needs to be authored to capture the activity related to this aspect of the service. Consideration should be given for development of a specific treatment function code (TFC) e.g. 343</p> |
| <p>K9 Monitoring</p> | <p>K9.1 Do any new or revised requirements need to be included in the NHS Standard Contract Information Schedule? If so, these must be communicated to <a href="mailto:CTownley@nhs.net">CTownley@nhs.net</a>, ideally by end of October to inform following year's contract</p> <p>K9.2 If this treatment is a drug, what pharmacy monitoring is required?</p> <p>K9.3 What analytical information /monitoring/</p> | <p>K9.1 Discussion will be necessary pending availability of above points in</p> <p>K9.2 Not applicable</p> <p>K9.3 Need development of coding methodology and national registry to be</p>   |

|                                   |  |  |
|-----------------------------------|--|--|
|                                   | <p>reporting is required?</p> <p>K9.4 What contract monitoring is required by supplier managers? What changes need to be in place?</p> <p>K9.5 Is there inked information required to complete quality dashboards and if so is it being incorporated into routine performance monitoring?</p> <p>K9.6 Are there any directly applicable NICE quality standards that need to be monitored in association with the new policy?</p> <p>K9.7 Do you anticipate using Blueteq or other equivalent system to guide access to treatment? If so, please outline. <i>See also linked question in M1 below</i></p> | <p>able to monitor effectively -</p> <p>K9.4 Need development of coding methodology and national registry to be able to monitor effectively</p> <p>K9.5 Yes – Specialised Respiratory dashboard will be incorporated into routine performance monitoring – work underway to clarify which providers should be submitting</p> <p>K9.6 NICE Motor Neurone Disease NG 42</p> <p>K9.7 No</p> |
| <b>Section L - Service Impact</b> |  |  |
| <b>Theme</b>                      | <b>Questions</b>   | <b>Comments</b> (Include source of information and details of assumptions made and any issues with the data)   |
| L1 Service Organisation           | <p>L1.1 How is this service currently organised (i.e. tertiary centres, networked provision)</p> <p>L1.2 How will the proposed service specification</p>   | <p>L1.1 Tertiary services with well recognised informal networks</p> <p>L1.2 Services will more clearly defined.</p>   |

|                       |  |   |
|-----------------------|--|---|
|                       | change the way the commissioned service is organised?  |   |
| L2 Geography & Access | <p>L2.1 Where do current referrals come from?</p> <p>L2.2 Will the new policy change / restrict / expand the sources of referral?</p> <p>L2.3 Is the new policy likely to improve equity of access?</p> <p>L2.4 Is the new policy likely to improve equality of access / outcomes?</p>   | <p>L2.1 Primary and (mainly) secondary care</p> <p>L2.2 No change</p> <p>L2.3 Yes this is the purpose of the revisions in the specification due to explicit description of service requirements</p> <p>L2.4 Yes the purpose of the revisions in the specification</p> |
| L3 Implementation     | <p>L3.1 Is there a lead in time required prior to implementation and if so when could implementation be achieved if the policy is agreed?</p> <p>L3.2 Is there a change in provider physical infrastructure required?</p> <p>L3.3 Is there a change in provider staffing required?</p> <p>L3.4 Are there new clinical dependency / adjacency requirements that would need to be in place?</p> <p>L3.5 Are there changes in the support services that</p> | <p>L3.1 No</p> <p>L3.2 No</p> <p>L3.3 No</p> <p>L3.4 No</p> <p>L3.5 No</p>  |

|                                   |   |  |
|-----------------------------------|---|--|
|                                   | <p>need to be in place?</p> <p>L3.6 Is there a change in provider / inter-provider governance required? (e.g. ODN arrangements / prime contractor)</p> <p>L3.7 Is there likely to be either an increase or decrease in the number of commissioned providers?</p> <p>L3.8 How will the revised provision be secured by NHS England as the responsible commissioner (e.g. publication and notification of new policy, competitive selection process to secure revised provider configuration)</p> | <p>L3.6 Not required</p> <p>L3.7 No change</p> <p>L3.8 N/A</p>   |
| L4 Collaborative Commissioning    | L4.1 Is this service currently subject to or planned for collaborative commissioning arrangements? (e.g. future CCG lead, devolved commissioning arrangements)?   | L4.1 No plans but recommended in specification to have close relationships with other ventilation services   |
| <b>Section M - Finance Impact</b> |   |  |
| <b>Theme</b>                      | <b>Questions</b>  | <b>Comments</b> (Include source of information and details of assumptions made and any issues with the data) |
| M1 Tariff                         | <p>M1.1 Is this treatment paid under a national prices*, and if so which?</p> <p>M1.2 Is this treatment excluded from national prices?</p>  | <p>M1.1 No</p> <p>M1.2 Yes</p>   |

|  |  |   |
|--|--|---|
|  | <p>M1.3 Is this covered under a local price arrangements (if so state range), and if so are you confident that the costs are not also attributable to other clinical services?</p> <p>M1.4 If a new price has been proposed how has this been derived / tested? How will we ensure that associated activity is not additionally / double charged through existing routes</p> <p>M1.5 is VAT payable (Y/N) and if so has it been included in the costings?</p> <p>M1.6 Do you envisage a prior approval / funding authorisation being required to support implementation of the new policy?</p> | <p>M1.3 Yes – a variety of local pricing arrangements in place, e.g. blocks, local unit prices</p> <p>M1.4 N/A</p> <p>M1.5 N/A</p> <p>M1.6 No because it may lead to patient harm</p>         |
| M2 Average Cost per Patient                          | <p>M2.1 What is the revenue cost per patient in year 1?</p> <p>M2.2 What is the revenue cost per patient in future years (including follow up)?</p>  | <p>M2.1 Difficult to answer as there is a variety of local pricing arrangements in place and with coding constraints difficult to identify patient cohort.</p> <p>M2.2 As above</p>           |
| M3 Overall Cost Impact of this Policy to NHS England | <p>M3.1 Indicate whether this is cost saving, neutral, or cost pressure to NHS England?</p> <p>M3.2 Where this has not been identified, set out the reasons why this cannot be measured?</p>   | <p>M3.1 Likely to be marginal or neutral – maybe some movement of patients into and out of specialised CHV services</p> <p>M3.2 Difficult to quantify but likely to be very small numbers</p> |

|  |  |   |
|--|--|---|
| <p>M4 Overall cost impact of this policy to the NHS as a whole</p> | <p>M4.1 Indicate whether this is cost saving, neutral, or cost saving for other parts of the NHS (e.g. providers, CCGs)</p> <p>M4.2 Indicate whether this is cost saving, neutral, or cost pressure to the NHS as a whole?</p> <p>M4.3 Where this has not been identified, set out the reasons why this cannot be measured?</p> <p>M4.4 Are there likely to be any costs or savings for non NHS commissioners / public sector funders?</p> | <p>M4.1 as above</p> <p>M4.2 Neutral as no new patients although potential increase in survival may lengthen time needed for NHS support however reducing the need for complex ventilation and reduced complications requiring inpatient care should reduce long term costs</p> <p>M4.3 N/A</p> <p>M4.4 Potential increased in survival may increase need for social care funding</p> |
| <p>M5 Funding</p>  | <p>M5.1 Where a cost pressure is indicated, state known source of funds for investment, where identified</p>   | <p>M5.1 Not applicable</p>  |
| <p>M6 Financial Risks Associated with Implementing this Policy</p> | <p>M6.1 What are the material financial risks to implementing this policy?</p>   | <p>M6.1 Whilst no material financial risks across NHS as a whole arising from this service specification, there may be a potential impact where complex home</p>  |

|                           |   |  |
|---------------------------|---|--|
|                           | <p>M6.2 Can these be mitigated, if so how?</p> <p>M6.3 What scenarios (differential assumptions) have been explicitly tested to generate best case, worst case and most likely total cost scenarios</p> | <p>ventilation is not distinctly identified and disaggregated from non-complex service where all currently charged to CCGs. Improved coding and patient identification may result in shift of costs between commissioners and therefore may require baseline adjustments to re-align funding.</p> <p>M6.2 See above re baseline adjustments</p> <p>M6.3 not applicable</p> |
| <p>M7 Value for Money</p> | <p>M7.1 What evidence is available that the treatment is cost effective?</p> <p>M7.2 What issues or risks are associated with this assessment?</p>  | <p>M7.1 Cost-effectiveness via a reduction in acute admissions has been shown for selected patients with COPD</p> <p>J Tuggey, P Plant, and M Elliott Non-invasive ventilation for recurrent acidotic exacerbations of COPD: an economic analysis. Thorax. 2003 Oct; 58(10): 867–871.</p> <p>M7.2 Relatively limited data</p>  |

|                 |  |                                   |
|-----------------|--|-----------------------------------|
| M8 Cost Profile | M8.1 Are there non-recurrent capital or revenue costs associated with this policy?<br><br>M8.2 If so, confirm the source of funds to meet these costs. | M8.1 No new costs<br><br>M8.2 N/A |
|-----------------|--|-----------------------------------|

FOR PUBLIC CONSULTATION ONLY
