SPECIALISED COMMISSIONING - CLINICAL EVIDENCE EVALUATION CRITERIA FOR A PROPOSITION FOR A CLINICAL COMMISSIONING POLICY FOR ROUTINE COMMISSIONING

URN: B13X04

TITLE: Stereotactic radiosurgery/radiotherapy for ependymoma,
haemangioblastoma, pilocytic astrocytoma and trigeminal schwannoma

CRG: Stereotactic radiosurgery

NPOC: Cancer

Lead: Nicola McCulloch

Date: 17th February 2016

The panel were presented a policy proposal for routine commissioning.

Question	Conclusion of the panel	If there is a difference between the evidence review and the policy please give a commentary
<u>The population</u> 1. Are the eligible and ineligible populations defined in the policy consistent with the evidence of effectiveness, and evidence of lack of effectiveness; and where evidence is not available for the populations considered in the evidence review?	The eligible population(s) defined in the policy are the same or similar to the population(s) for which there is evidence of effectiveness considered in the evidence review	
<u>Population subgroups</u> 2. Are any population subgroups defined in the policy and if so do they match the subgroups considered by the evidence review?	The population subgroups defined in the policy are the same or similar as those for which there is evidence in the evidence review

<p><u>Outcomes - benefits</u></p> <p>3. Are the clinical benefits demonstrated in the evidence review consistent with the eligible population and/or subgroups presented in the policy?</p>	<p>The clinical benefits demonstrated in the evidence review support the eligible population and/or subgroups presented in the policy</p>	<p>The panel received an evidence summary on 4 different types of tumours, where management of recurrent/residual tumour is a rare entity and accepted the level of evidence (of prospective case series) as likely to be the best available.</p> <p>The panel accepted that the grounds of commissioning are benefits of intervention on tumour growth control, for which they believed there was enough evidence.</p> <p>The panel would expect the commissioning criteria to include tumour growth.</p>
<p><u>Outcomes – harms</u></p> <p>4. Are the clinical harms demonstrated in the evidence review reflected in the eligible and / or ineligible population and/or subgroups presented in the policy?</p>	<p>The clinical harms demonstrated in the evidence review are reflected in the eligible population and/or subgroups presented in the policy</p>	
<p><u>The intervention</u></p> <p>5. Is the intervention described in the policy the same or similar as the intervention for which evidence is presented in the evidence review?</p>	<p>The intervention described in the policy the same or similar as in the evidence review</p>	
<p><u>The comparator</u></p> <p>6. Is the comparator in the policy the same as that in the evidence review?</p>	<p>The comparator in the policy is the same as that in the evidence review.</p>	

FOR PUBLIC CONSULTATION ONLY

<p>7. Are the comparators in the evidence review the most plausible comparators for patients in the English NHS and are they suitable for informing policy development.</p>	<p>The comparators in the evidence review include plausible comparators for patients in the English NHS and are suitable for informing policy development.</p>	
<p><u>Advice</u> The Panel should provide advice on matters relating to the evidence base and policy development and prioritisation. Advice may cover:</p> <ul style="list-style-type: none"> • Uncertainty in the evidence base • Challenges in the clinical interpretation and applicability of policy in clinical practice • Challenges in ensuring policy is applied appropriately • Issues with regard to value for money • Likely changes in the pathway of care and therapeutic advances that may result in the need for policy review. 		<p>The panel recommended a routine commissioning proposal. Entry criteria should be amended to include evidence that:</p> <ol style="list-style-type: none"> 1. Residual/recurrent tumour is growing; 2. That there is no surgical option; and 3. That such growth will result in significant morbidity and mortality. <p>The panel also agreed that this should include a note that the decision whether to proceed is shared with patient.</p>

Overall conclusions of the panel

Report approved by:

James Palmer

Clinical panel Chair
